

NCC erects eight semi-detached hillside houses in Bollstanäs, Upplands Väsby, Stockholm.

THE OUTER WALLS OF THE SECOND FLOOR AND THE ROOF MOUNTED

These houses are equipped with Resaro's structural elements in bottom and upper floor, including outer walls in bottom floor.

Upper floor outer walls are made with framework of wood.

In the future we will see small houses and villas with Resaro's energy conserving concrete walls, right up to the roof.

Outer walls without cold bridges, manufactured by use of Resaro's new fast low cost casting procedure.

Furnished with i.e. wood panel if desired.
